How Can We Help	35

**To learn more about Healthcare cleaning programs
visit our i-Lab when you are next in Sydney**

"Change is the essential ingredient we all need to improve the lives of those around us."

The challenges we face in Hospital cleaning stem from our issues revolving around cleaning programs not keeping up to date with current infection control thinking. In many hospitals they are still using traditional mop bucket that mop floors with dirty used mopping solution and cloths are often used in multiple area causing possible cross contamination.

These issues combined with cleaners often doing their own thing and using whatever cleaning tools they have often results in the movement of dirt and germs around the facility instead of actual cleaning and disinfection. Corners being cut in cleaning and disinfection can result in patients and staff being put at risk.

This Hospital Cleaning Systems brochure pulls together many different solutions that you can use to create your very own best practice cleaning program.

In building your Hospital cleaning program it is important that your system includes the following:

- Each area should be cleaned with a separate mop or cloth
- Mops and cloths should be moistened correctly to ensure thorough clean and pickup instead of spread
- Trolleys should be setup with enough mops and cloths for each area
- Sufficient laundered microfibre should be on hand to ensure that tomorrows supplies are on site today
- The trolley needs to setup with all the required tools and consumables to minimise trips back to the cleaners room
- Cleaners need to be trained on what tasks should be completed within each clean type
- Cleaners should be following a specific schedule
- TouchPoints should be a priority and should be cleaned in a specific order
- Trolleys should be cleaned and disinfected daily

Our mission: Saving Lives Through Science Based Cleaning

The InterClean Group specialises in creating efficient, effective and implementable cleaning systems for Hospital facilities across Australia.

Call us on (02) 8824 2740 or ask the distributor that gave you this brochure for more details.

Quick Reference Guide

Product Description	Advantages	Used For:	Used In:
<p>Touchpoint Alcohol Hand and Surface Sanitiser Wipes</p> 	<ul style="list-style-type: none"> · Isopropyl Alcohol Hand Sanitiser Wipes · Small Tub with 70 Wipes · Large Tub with 1000 Wipes · Perfect for personal touchpoints like keyboards, computer mice, mobile phones and tablets & screens 	<ul style="list-style-type: none"> · Sanitising Hands · Sanitising Touchpoints in personal office spaces · Sanitising door handles, handrails, lift buttons, switches, taps and toilet buttons 	<ul style="list-style-type: none"> · Health, Education, Hospitality, Transportation wherever hands or Touchpoints need alcohol sanitising · Should be used to disinfect handles on your cleaning trolleys at the end of each day
<p>TouchPoint Microfibre Cleaning & Sanitising Cloths</p> 	<ul style="list-style-type: none"> · Highest quality Ready-To-Use Microfibre wipes for removing 99.9% of dirt & germs from Touchpoint surfaces · Active ingredient, Benzalkonium chloride · 50 large microfibre wipes · Safe to use on all surfaces 	<ul style="list-style-type: none"> · Cleaning and removing germs from Touchpoint surfaces in high risk areas · Cleaning glass, plastic and metal surfaces requiring minimal amounts of moisture 	<ul style="list-style-type: none"> · Hospitals, Aged Care facilities, public transport, Hospitality, Restaurants, places of worship and all areas requiring a high level of clean where there are risks of cross contamination
<p>TouchPoint Hospital Disinfection Wipes</p> 	<ul style="list-style-type: none"> · Cleans and disinfects in one step · TGA registered with specific claims · Can be used all day on all surfaces · 25 wipes per pack 	<ul style="list-style-type: none"> · Cleaning and Disinfecting surfaces where a TGA registered disinfectant with specific claims for bacteria and viruses is required · Cleaning and disinfecting surfaces requiring constant disinfection 	<ul style="list-style-type: none"> · Aged care, Hospitals, Day clinics, Dentists, Doctors surgeries and any facilities wanting a healthcare type of clean and disinfection without using alcohol or chlorine
<p>Touchpoint 1000PPM Isolation Wipes</p> 	<ul style="list-style-type: none"> · Used for disinfecting infectious areas with 1000PPM chlorine wipes · TGA registered with specific claims · 5 extra large wipes per pack · Safer and more effective than traditional bleach products 	<ul style="list-style-type: none"> · Disinfection of surfaces in single rooms where a 1000PPM chlorine disinfection is required in a safer and easier to prepare way 	<ul style="list-style-type: none"> · Hospitals, Aged Care facilities, Ambulances and all facilities requiring a 1000PPM chlorine disinfection of single rooms · Public toilets where there is a risk of contamination

Cleaning or Disinfection Wipes</p> 	<ul style="list-style-type: none"> · 90 Large wipes prepared on site with your own cleaning or disinfecting solution · Dispensers from 4L bucket with special lid to keep wipes fresh · Fits onto InterClean Trolleys 	<ul style="list-style-type: none"> · Cleaning or Disinfection of surfaces in multiple areas where you require a better and more cost-effective way to wipe surfaces with your own cleaning solution or disinfectant 	<ul style="list-style-type: none"> · Hospitals, Aged care facilities, day surgeries and all healthcare facilities requiring a disposable (non launderable) cleaning program for their normal or infectious cleans

Six points to creating your COVID cleaning plan

Think as if you have COVID-19 right now.

The first thing you should do when wanting to take cross contamination seriously is to presume your patients, staff and visitors are currently at risk. We need to understand that your facility is the newest patient as COVID-19 can survive on surfaces for up to 3 days. With this new understanding that our facility itself may be infected, it's essential that we develop a way to clean and disinfect its surfaces thoroughly, even when we have limited staff.

Identify the High-Risk Areas and TouchPoint surfaces

Take a close look at what areas within your facility have lots of people passing through touching the same surfaces. Hand rails and lift buttons in public corridors. TouchPoints in public toilets, Taps, Fridge handles, Microwave panels & bins in shared canteen areas. Chairs and tables in shared dining areas. TouchPoints in personal workstations (particularly Nurses stations) where multiple staff share keyboards and computer mice. These surfaces are the most important surfaces to keep clean as they are touched multiple times per hour by multiple people.

Increase cleaning frequency

Thirdly, increase the frequency of cleaning from weekly to daily or from daily to hourly. Depending on how many people are moving through your facility and touching your TouchPoints. Increasing the frequency of your cleaning will minimise the chance of them touching an unclean surface. To do this you may need to consider having disposable wipes available so that all staff can help keep their areas clean.

Reschedule and validate your cleaning

Once you know what surfaces need to be cleaned more often, schedule your areas to be cleaned using our iClean digital cleaning management program. This system can also be used to validate that cleaning has been done properly, at the right frequency, by a trained and certified cleaner.

Train all staff to be able to help keep TouchPoints clean

With many front line cleaners in healthcare settings not coming to work at the moment you may need to find alternative ways to keep your TouchPoints clean. Using disposable ready-to-use wipes that can be used by all staff, you should be able to keep your facility clean even when cleaning staff are hard to find. Just make sure you have the right wipes on hand and your staff know how to use them.

Ensure hand washing is easy for all staff

If soap and water is not available everywhere use our TouchPoint Alcohol Hand and surface sanitiser wipes. These can be used to sanitise hands and also sanitise TouchPoints in personal surfaces likes keyboards, computer mice and mobile phones.

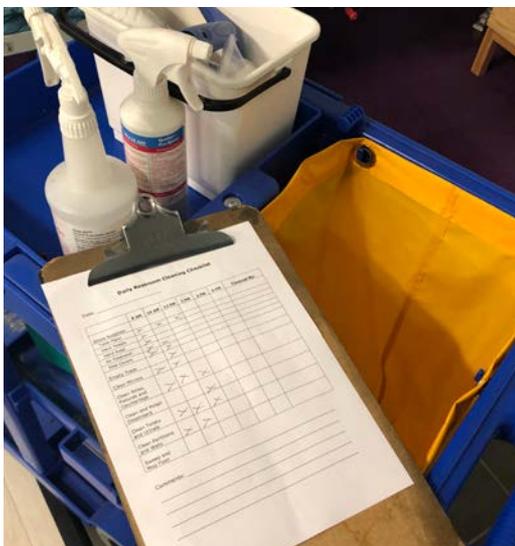

For help creating your disposable disinfection program, implementing and training your staff, please call us today

The iClean Hospitality Suite has been created specifically for Hospitality Managers, responsible for outcomes across a number of wards.

For the first time ever we have designed a complete digital package that allows cleaning managers to schedule, supervise, communicate and audit cleaning outcomes across their sites. The Hospitality Suite combines the iClean Management tool plus the CI auditing app together for a total solution for managing multiple Healthcare facilities.

Looking for help?

Ask us today about creating a customised healthcare cleaning program

Challenges

- Cleaning supervision across all your sites is not always possible
- Paper run sheets do not provide transparency of what was and wasn't done
- Difficult to compare results across all your sites
- Cleaners often don't understand instructions due to language barriers
- No ability to pull accurate reports about when your rooms were cleaned or how long they took

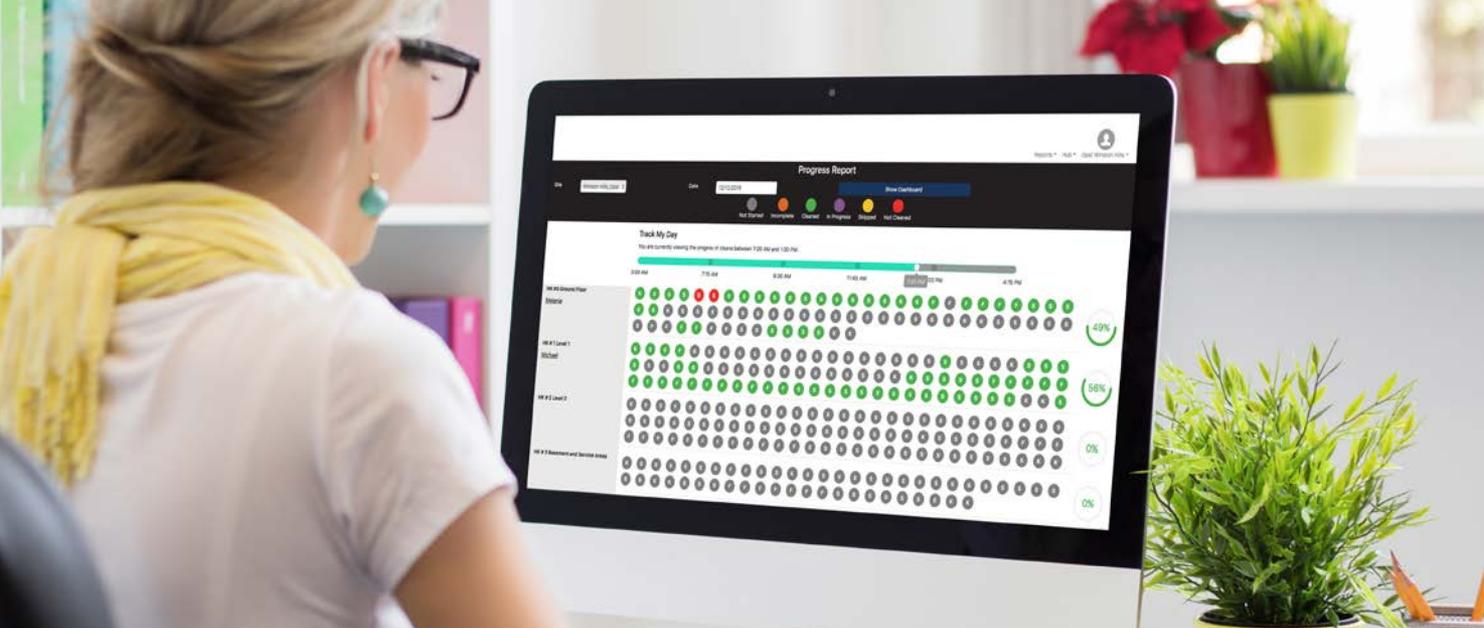

Empower your Supervisors and Staff at the Operational Level

- Reap the benefits of a digital system creating cleaning efficiencies
- Ensure that your training and expectations are standardised across your sites
- Access corrective actions management and instant reporting through customised dashboards

Real-time run sheet showing Areas to Clean, Clean Types and Tasks

Capture what was cleaned, how long it took and why a room was not cleaned

Solutions

- Dynamic cleaning schedules
- Standardised visual training
- Communication channel between cleaners, maintenance and supervisors
- Accountability in reporting
- Efficiency gains through managed schedules
- Integrated Audit Data
- Save time writing up audits in excel
- Corrective Actions Management
- Real Time Dashboard Reporting

Visual task instructions to help cleaners understand what tasks are required

Ensure correct guidelines are followed for Infectious cleans

Real-time digital auditing creating a culture of continuous improvement

Are you using disposable wipes for infectious / outbreak cleaning ?

When faced with the task of infectious or outbreak cleaning it is essential that we gain the best clean and disinfection result possible out of the labour and products we use.

In an emergency situation your cleaning products need to be easy to use and as close to fool-proof as possible. Wipes should be in packets or buckets that ensure that the solution is evenly distributed across all wipes, and the cleaning and disinfectant solution should be fit for purpose and be registered with the appropriate claims that you require. Using ready-to-use wipes pre moistened with the right cleaner or disinfectant will save you lots of time and make it easier for other facility staff to help out your cleaning staff.

Add your own disinfectant to our our 90 count rolls:

1. Place a new roll of Disposable Disinfection wipes into a clean bucket.

2. Pour 2 litres of disinfection solution onto the wipes.

3. Pull the first wipe through the opening, lock the lid by placing onto bucket and rotating to the right.

4. Press lid firmly onto bucket to keep contents fresh.

5. Close the lid by rotating the seal shut keeping the first wipe ready for use.

6. Place bucket on trolley ready for use.

Touch Point Hand Sanitising alcohol wipes

Isopropyl alcohol wipes for hands and personal space Touch Points

FEATURES

- Reduces 99.9% of harmful germs and bacteria on your hands.
- Suitable to sanitising Touchpoints in your personal workspace like mobile phones, screens and keyboards
- Unlike runny sanitising gels, wipes do not cause a mess.
- Available in 70 count and 1,000 count tubs

Touchpoint Hospital Disinfection Wipes

Non Alcohol Wipes - TGA Registered with specific claims

FEATURES

- Cleans and disinfects in one step
- Each wipe delivers the right amount of disinfectant without any quat binding issues
- Most vegetative bacteria are killed within 2 minutes
- Low foaming suitable for continuous cleaning and disinfecting on all surfaces

1000PPM Isolation Wipes

Disposable wipes with 1000 PPM chlorine Disinfection

FEATURES

- Broad-Spectrum Disinfection
- Easy To Use 5 large wipes with 1000PPM chlorine disinfectant
- Safer on surfaces than traditional bleach
- Always Correct Dose

Touch Point Microfibre Cleaning & Sanitising Cloths

High quality disposable microfibre moistened with Active ingredient, Benzalkonium Chloride

FEATURES

- Highest quality Ready-To-Use Microfibre wipes for removing 99.9% of dirt & germs from your Facility Touchpoint surfaces
- Active ingredient Benzalkonium Chloride .13%
- 50 large microfibre wipes
- Safe to use on all surfaces

P.O.S Disposable Disinfection Wipes

Prepare on site roll of 90 disposable cloths to be used with your own cleaning or disinfectant solution

FEATURES

- 90 large wipes ready to soak up your solution
- Fits onto Interclean trolleys
- Create your ready-to-use wipes

4L Colour Coded Disposable Wipes Buckets

4L buckets to hold 90 count rolls of disposable wipes.

FEATURES

- 4L plastic buckets
- Available in Red, Blue, Green, Yellow and White
- Special dispensing lid with lock to retain moisture
- Fits onto cleaning trolley

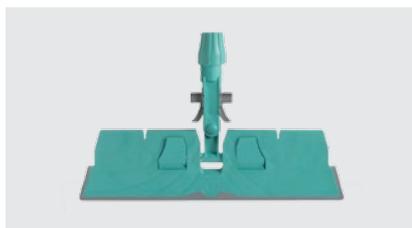

Are you using the correct disposable mops?

When it comes to Disposable Flat Mops, there are a few things to consider. Do you need the mop for small or large area cleaning? Do you need to clean, disinfect or pick up spills? How will you moisten the mop?

The new Trillogy disposable mop allows you clean using both sides of the mop. This means you can cover larger areas or use the first side to clean the floor and the second side to clean it again.

All of our disposable mops are moistened with different amounts of solution and are suitable for various sized floors. The main mop that is used in Aged care is the Disposable Micro Mop and it is generally used when mopping floors with a 1000PPM chlorine disinfectant.

Trillogy Double Sided Frame for Trillogy Mop

Allows you to hold and release double sided mops including Trillogy double sided disposable mops

FEATURES

- Fits onto all Telescopic handles
- Wide mouth easily allows Trillogy disposable mops to be held correctly
- Easy release to minimise handling of used mops

Trillogy Double Sided Disposable Flat Mop

Allows you to clean up to 25 m² with a single mop, ensuring significant time savings

FEATURES

- Double sided mop picks up and hold twice as much as standard disposable mops
- Very low friction: fibres glide on non-slip safety floors
- Disposable: greatest control on cross contamination
- Time-saving: you double the cleaned surface with two cleaning sides
- Touch-free: the detaching system avoids any contact with the dirt

Drip Fix Spill Pads

Spill pads absorb up to 1L of liquid making it easy for pickup before cleaning

FEATURES

- **NO DRIPPING:** Super-absorbing polymers inside pad transform the absorbed liquid into a gel, which is retained, without any dripping
- **SUPER-ABSORBING:** Drip-Fix spill pads can absorb approximately 1000 ml of tap water
- **NO RISK OF CROSS CONTAMINATION:** Upper printed side is impermeable and avoids any hand contact with the

40cm Flat Mop Head (low profile) for Disposable

Special low profile attachment system allows easy pickup of disposable mops without limiting cleaning surface

FEATURES

- Available in Yellow, White, Grey
- Locking mechanism allows mop to be used on wall and ceilings
- Also has clasps for use with disposable dusting cloths
- Attachment strips are replaceable

Disposable Micro Mops

The standard in disposable mops, available in White,

FEATURES

- Absorption 100ml
- Cleaning 15-20 m²
- Prepare mops in bucket or bag

Disposable Disinfection Mops

Fibres specifically designed to deliver disinfectant solution to your floor.

FEATURES

- Absorption 170ml
- Disinfection 25 m²
- Prepare mops in bucket

Disposable Spill Mops

Each mop will absorb up to 250 ml of liquid without spreading it.

FEATURES

- Absorbs up to 250ml of liquid spills.
- Use a separate Micro Mop to clean area after spill has been removed.

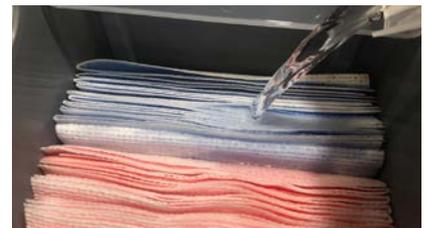

Disposable Pre-Moistened

Pre-moistened with active ingredients to easily remove grease and grime for all floors.

FEATURES

- Pre moistened to allow all care staff to be able to take a ready-to-use mop and mop floor without having to moisten one mop.
- 40 cm disposable mop, same as above but already moistened.

Disposable Preparation Bucket

Preparation bucket with bottom grid

FEATURES

- Preparation bucket with bottom grid allows you to pre-moisten your mops or wipes with the correct amount of solution or disinfectant.

Do you have an infectious trolley setup to do extra Touchpoint cleaning?

Our small base cleaning trolleys can be setup specifically for your infectious / outbreak cleans or can be used by cleaners doing extra Touchpoint cleaning across your facility.

Ready-to-use disposable wipes and mops are stored at the front of the trolley, backup supplies are stored in lockable draw behind and a bin area for used disposable sits under your desk area.

All handles fit on the side rails and there is an area for your iPad.

Keep all your ready-to-use disposable wipes in a locked draw at the rear of your infectious cleaning trolley.

COMPACT-1

FEATURES

- WxDxH 80x58x115cm
- 150L yellow lid
- 4L blue and red buckets with lids
- 20L blue hermetic bucket with lid

COMPACT-I (Infectious)

FEATURES

- Dimensions WxDxH 80x58x112cm
- 150L yellow white desk compartment
- 4L yellow bucket
- 8L yellow bucket
- 10L yellow hermetic bucket with lid

COMPACT-T (Theatre)

FEATURES

- WxDxH 80x58x115cm
- 150L grey white desk compartment
- 4L white bucket
- 20L white hermetic bucket with lid

COMPACT-C (Cytotoxic)

FEATURES

- Dimensions WxDxH 77x60x117cm
- 150L grey white desk compartment
- 8L purple bucket
- 20L purple hermetic bucket with lid

This is the main trolley we use when setting up a microfibre cleaning program in an hospital

COMPACT-1

FEATURES

- Dimensions WxDxH 80x58x115cm
- 150L yellow lid
- 4L blue and red buckets with lids
- 20L blue hermetic bucket with lid

COMPACT-D (Desk)

FEATURES

- Dimensions WxDxH 80x58x115cm
- 150L yellow green desk compartment
- 4L blue & red bucket
- 10L red hermetic bucket with lid
- 10L blue hermetic bucket with lid

SMALL-3

FEATURES

- Dimensions WxDxH 117x58x110cm
- 120L yellow lid for bag holder
- 22L drawer
- 4L blue, red, green & yellow buckets
- 1 side basin for 10 or 20L bucket
- 20L blue bucket
- * Bag in pic not included

SMALL-8

FEATURES

- Dimensions WxDxH 125x58x115cm
- 120L yellow lid for bag holder
- 22L drawer
- 8L blue, red & yellow buckets
- 2 side basins for 10 or 20L buckets
- 20L red & blue buckets with lids
- * Bag in pic not included

MEDIUM-5

FEATURES

- Dimensions WxDxH 128x55x110cm
- 120L yellow lid for bag holder
- 22L drawer
- 4L blue, red, green & yellow buckets
- * Bag in pic not included

MEDIUM-6

FEATURES

- Dimensions WxDxH 128x55x110cm
- 120L yellow lid for bag holder
- 22L drawer
- 4L blue, red, green & yellow buckets
- * Bag in pic not included

SMALL-10

FEATURES

- Dimensions WxDxH 97x60x117cm
- 120L yellow lid for bag holder
- 22L drawer
- 4L blue, red, yellow & green buckets wit lids
- 20L blue hermetic bucket with lid
- Single Accu-Dose unit
- * Bag in pic not included

SMALL-11

FEATURES

- Dimensions WxDxH 97x60x117cm
- 120L yellow lid for bag holder
- 22L drawer
- 8L blue, red & yellow buckets
- 20L blue bucket with lid
- Single Accu-Dose unit
- * Bag in pic not included

MEDIUM-8

FEATURES

- Dimensions WxDxH 128x65x110cm
- 120L yellow lid for bag holder
- 22L drawer
- 4L blue, red, green & yellow buckets
- Wringer support bar
- Tec Wringer
- 2 x 15L blue & red buckets
- * Bag in pic not included

MEDIUM-16

FEATURES

- Dimensions WxDxH 117x58x110cm
- 150L yellow lid for bag holder
- 22L drawer
- 8L blue, red & yellow buckets
- 20L blue & red buckets with lids
- * Bag not included

MEDIUM-17

FEATURES

- Dimensions WxDxH 130x60x117cm
- 150L yellow lid for bag holder
- 22L drawer
- 4L blue, red, green & yellow buckets with lids
- 20L blue bucket with lid
- Single Accu-Dose unit
- * Bag not included

MEDIUM-19

FEATURES

- Dimensions WxDxH 142x60x117cm
- 150L yellow lid for bag holder
- 22L drawer
- 4L blue, red, green & yellow buckets with lids
- 20L blue & red buckets with lids
- Dual Accu-Dose unit
- * Bag not included

High & Low Dusting

The Shaggy High Dusting Tool has been designed as a response to your request for a high dusting tool that grabs all types of dust from all types of surfaces without letting the dust go.

The Shaggy microfibre dusting cover fits onto our Shaggy frame which can be used hand help or attached to adjustable handles.

Frame can be easily adjusted to any angle using a push button or frame can be bent by hand.

Covers can be laundered up to 500 times and should be laundered daily.

Shaggy High Dusting Tool Covers

Covers are 40cm and come in blue and white.

FEATURES

- High quality heavy duty microfibre strands collect and hold micro dust.
- Fits Shaggy dusting frame
- Can be laundered 500 times

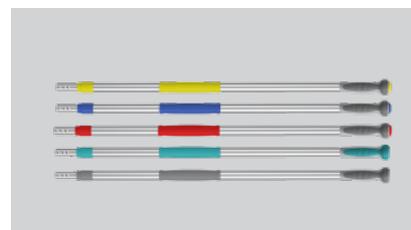

Shaggy High Dusting Tool Frame

Fits onto Telescopic Handles and Reach Extension Poles.

FEATURES

- Used to hold Shaggy dusting head
- Hand held handle or fits on adjustable handles

Adjustable Handles

Regardless of height, the telescopic pole can be adjusted to suit each of your cleaners individually.

FEATURES

- Colour coded
- Soft grip handle stops mop sliding when resting on wall
- Easy to clean and disinfect

Glass Cleaning

This glass cleaning system easily cleans glass and mirrors in 70% less time than traditional methods

Activate your glass microfibre covers or Bella glass cloths with a single spray from your Micro-mist sprayer and wipe glass clean.

Use another pad or cloth if they become too wet. Should be laundered after daily use.

For larger areas, spray the surface with water and wipe clean with dry cloth or pad.

Hand Held Holders

Available in 30cm and 40cm to hold Glass Microfibre covers

FEATURES

- Low profile attachment system ensures that glass cover is held without reducing cleaning area of cover
- Available in 30cm or 40cm
- Can be used to clean desks and large surfaces quickly

Glass Microfibre Covers

Special Microfibre covers to clean glass efficiently and effectively every time

FEATURES

- The perfect blend of microfibre for cleaning glass and shiny surfaces
- Can be laundered 250 times

Bella Shiny Glass Microfibre Cloth

40cm X 60cm large Microfibre cloths for cleaning all types of glass and mirrors

FEATURES

- Large cloth specifically designed for glass and shiny surfaces
- Can be laundered 750 times
- Non abrasive scrubbing pad in corner for removing food residues

Microfibre Cloths & Wall Washing

Colour coding cleaning materials and tools ensures that these items are not used in multiple areas, therefore reducing the risk of cross contamination.

Microfibre is a synthetic fibre that is microscopic compared to natural fibres. Ultra-microfibrils are 100 times smaller than a human hair and their star structure gives a surface area 40x greater than conventional cotton fibre.

Microfibre cloths are designed to remove 99.9% of germs from most non-porous surfaces. They can be laundered up to 95 degrees Celsius and work with or without the use of chemicals. In aged care they should be used with neutral cleaner or bathroom cleaner.

TouchPoint Microfibre contains silver that inhibits bacteria growth, so not only will your surfaces be clean but your cloths will sanitise themselves.

Our edging is reinforced helping to keep the shape of the cloth to ensure it folds easily even after 500 washes.

BLUE Used in general areas including wards, departments, offices and basins in public areas.

RED Used in bathrooms, wash-rooms, showers, toilets and basins.

BLEACH RESISTANT WHITE Used when using bleach under instruction from your infection control manager.

YELLOW Used in highly critical isolation areas where the risk of cross-contamination is greatest.

GREEN Used in food preparation areas such as patient food service at ward level.

PURPLE Used in cytotoxic areas as safely handle cytotoxic toxins and waste.

Scrubby

These microfibre scourers are designed to scrub basins, wall tiles, grout.

FEATURES

- High quality microfibre with polypropylene patches scrubs surfaces and picks up broken greases and dirt
- Available in 5 colours
- Can be washed at 95°
- Silver antibacterial technology

Healthcare Cloth with Scrub Corner

New cloths with a 12cm scrub corner will allow you to scrub and clean your surfaces at once.

FEATURES

- Can be laundered over 750 times
- Silver antibacterial technology
- Sanitises itself as you clean
- Can be washed at 95°

Bleach Resistant Microfibre Cloths

Yellow and White cloths are designed to withstand the effects of bleach from cleaning or laundering solution.

FEATURES

- Can be laundered over 500 times
- Silver antibacterial technology
- Sanitises itself as you clean
- Can be washed at 95°

40cm Flat Mop Head

40cm flat mop frames with high quality attachment strips to hold mops in place during cleaning.

FEATURES

- Colour coded
- Locking mechanism allows head to be used for cleaning walls and ceilings
- Replaceable attachment strips

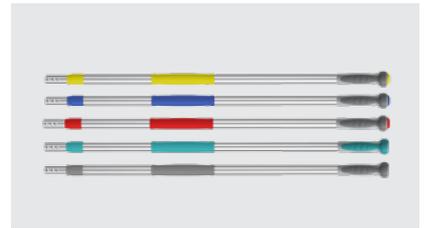

40cm Wall-E Wall Washing Covers

Same material as our healthcare cloths pleated into a 40cm wall washing cover.

FEATURES

- Can be laundered over 500 times
- Silver antibacterial technology
- Yellow and White are bleach resistant
- Can be washed at 95°

Adjustable Handles

Regardless of height, the Telescopic Pole can be adjusted to suit each of your cleaners individually.

FEATURES

- Colour coded
- Soft grip handle stops mop sliding when resting on wall
- Easy to clean and disinfect

Which Mop For Which Floor?

Clean & Dry Microfibre for:

- Low maintenance vinyl
- Sealed vinyl floors
- Smooth tiled floors

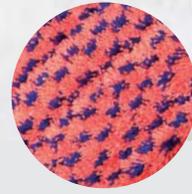

Scrub & Dry Microfibre for:

- Non-slip rated floors with raised abrasives
- Non-slip dimpled floors
- Hard to clean kitchen floors where more solution is required

Scrub & Clean Microfibre for:

- Timber looking vinyl where dirt gets trapped in the grain
- Low maintenance & sealed vinyl floors in high traffic areas
- Where extra scrubbing of scuff marks and food is required

Scrub-E Wall & Floor Microfibre for:

- Compact areas like bathrooms where showers, walls & floors can be cleaned with one mop

Mineral Scrub Mop for:

- Mineral stained glass & tiles that require extra scrubbing
- Highly non-slip flooring

Pre-Moistening Your Mops

1 Place correct amount of mops vertically in your bucket.

2 Place sieve over bucket to allow for even dispersion.

3 Pour correct amount of solution over the sieve to moisten all mops.

4 Place hermetic lid onto bucket and lock to seal.

5 Lift bucket upside down to help mops absorb evenly.

6 Take a clean mop to clean each area and place into laundry bag at back of trolley after use.

Scrub-E Microfibre Cover

Use the Scrub-E Microfibre Cover for normal bathroom floors. Covers are 30cm.

FEATURES

- 70% High quality microfibre with 30% polypropylene scrubbing patches
- Two microfibre cloths inside absorb and hold picked up dirty cleaning solution
- Silver anti-bacterial technology
- Can be laundered 750 times

Clean & Dry Mop Cover

Clean & Dry Covers are designed for mopping normal, low maintenance, sealed or tiled floors.

FEATURES

- Highest quality microfibre with two internal cloths for absorption
- Raised edges to allow mop to glide over large floors like hallways
- Silver anti-bacterial technology
- Can be laundered 750 times

Scrub & Clean Mop Cover

Scrub & Clean covers are designed for mopping sealed or tiled floors where extra scrubbing or cleaning edges is required without causing extra drag.

FEATURES

- 50% of mop surface with scrubbing blend followed by 50% for cleaning floor
- Scrubbing edge allows you to clean into skirting edge
- Silver anti-bacterial technology
- Can be laundered 750 times

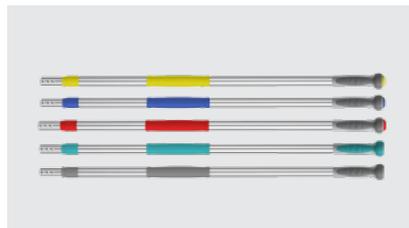

40cm Flat Mop Head

40cm flat mop frames with high quality attachment strips to hold mops in place during cleaning.

FEATURES

- Colour coded
- Locking mechanism allows head to be used for cleaning walls and ceilings
- Replaceable attachment strips

Adjustable Handles

Regardless of height, the Telescopic Pole can be adjusted to suit each of your cleaners individually.

FEATURES

- Colour coded
- Soft grip handle stops mop sliding when resting on wall
- Easy to clean and disinfect

Aquamop

40cm Aquamops allow you to mop small and large floors with operating using as much or little solution as required.

FEATURES

- Colour coded
- 40cm replaceable attachment strips easily hold mops in place
- Holds all types of launder-able microfibre mops
- Standard 650 ml Solution bottle or 1L bottle available

Are you using Pedal operated touch-less bins?

COLOURS AVAILABLE

Hands free wall mounted bins allow for used PPE equipment to be discarded without contamination from touching bin surfaces

Pedal operated bins should be utilised for used PPE equipment so that cross contamination is avoided when placing used items in bin.

Derby Bin 30L

Easy to clean 30L bins are available with a variety of lid colours.

FEATURES

- Completely made in polypropylene
- Shock-resistant, with rounded corners and smooth contours for easy cleaning
- Available with coloured lids
- Hands free large foot pedal operation
- Divider available

Derby Bin 60L

Same width as our 30L bins the 60L is simply taller.

FEATURES

- Completely made in polypropylene
- Shock-resistant, with rounded corners and smooth contours for easy cleaning
- Available with coloured lids
- Hands free large foot pedal operation
- Divider available

Wall-up

Hanging bin ideal for areas where frequent cleaning is needed.

FEATURES

- Completely made in polypropylene
- Wall mounted to allow for easy cleaning
- Available with coloured lids
- Hands free large foot pedal operation

Single Linen Trolley

70L Laundry trolley with bag holder for separate linen collection.

FEATURES

- Trolley with bumpers
- Equipped with 80mm wheels
- With bag tightener band
- Easy Push Handle

Dual Linen Trolley

Dual Two by 70L Laundry trolley with bag holders for separate linen collection.

FEATURES

- Trolley with bumpers
- Equipped with 80mm wheels
- With bag tightener band
- Easy Push Handle

Triple Linen Trolley

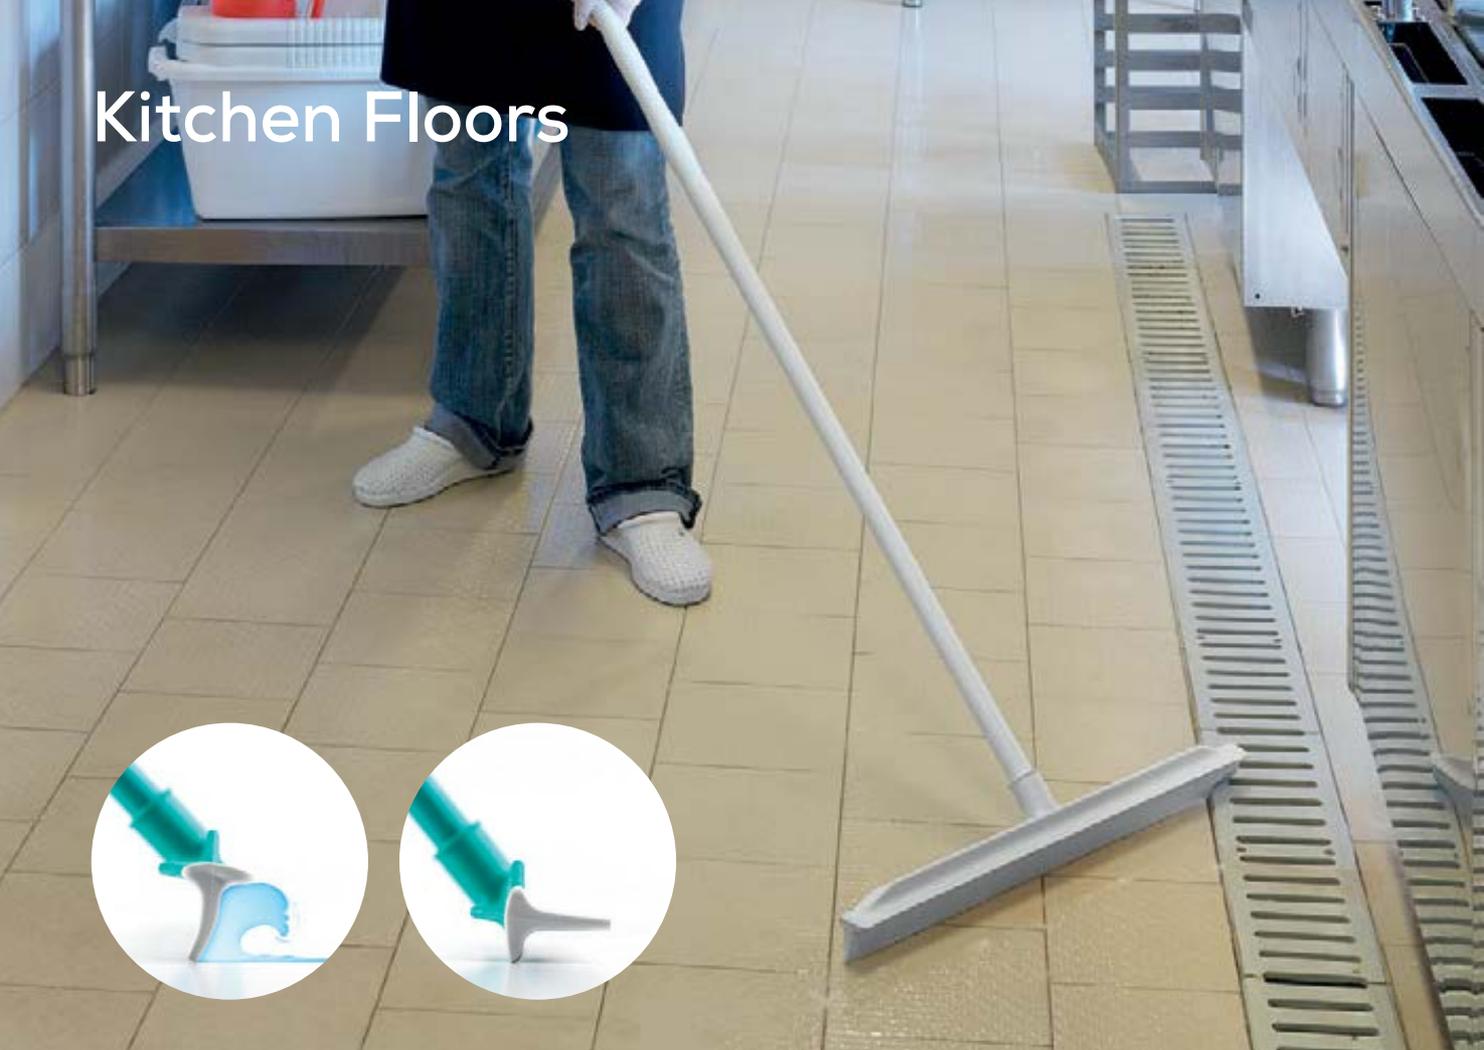

Triple three by 70L Laundry trolley with bag holders for separate linen collection.

FEATURES

- Trolley with bumpers
- Equipped with 80mm wheels
- With bag tightener band
- Easy Push Handle

Kitchen Floors

Colour coding your cleaning materials and tools ensures that these items are not used in multiple areas, therefore reducing the risk of cross contamination.

Aqua Dust Pan

Bag based dust pan and squeegee to pick up any type of dirt, either solid or liquid.

FEATURES

- Plastic bag fits over frame opening
- Squeegee allows easy movement of liquids into bag
- Fits many sizes of plastic bag

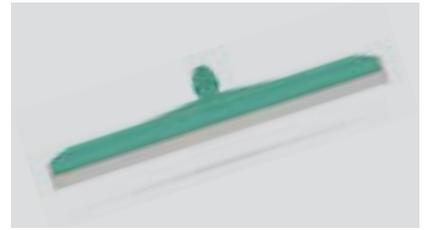

Dike Floor Squeegee

Heavy duty hygienic floor squeegee with scraper.

FEATURES

- Water is moved forward without leaving drips on the floor
- Made strong with single rubber blade
- Can be sterilized up to 120 degrees for 40 mins
- Supplied with polypropylene scraper to easily remove build up

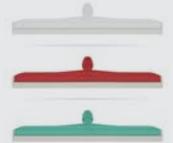

Double Blade Floor Squeegee

Double bladed soft floor squeegee moves large amounts of water quickly leaving floor dry.

FEATURES

- Available in 45 and 55cm
- Soft rubber white blade molds into floor shape to remove solution easily
- Fits onto polypropylene handles

Polypropylene Handles

Designed to hold floor squeegees.

FEATURES

- Easy to clean squeegee handles
- Can be sterilized up to 120 degrees for 40 mins

Scrub & Dry Mop Cover

Scrub & Dry covers are designed for mopping safety floors that are normally found in kitchens

Frequently asked questions

Does it work in a port a loo?

Yes all our urinal screens are perfect for use in port a loos and septic systems as the optimised bacteria assists in breaking down waste.

Do the screens work in a waterless urinal?

Yes, they are perfect to use in waterless urinals as the bacteria is activated when urine hits the screen.

How does this help to clean the drains?

The optimised bacteria in the waves is designed to help breakdown organic build up and keep drains clear.

What is the best way to install the waves?

With the nibs up, the InterClean logo facing up.

What is the safest/most hygienic way to remove the waves?

By using one of our hand held grabbers, so that there is no touching of the waves.

What are the most popular fragrances?

Mango, Kiwi Grapefruit, Cotton Blossom

What is the strongest fragrances?

The top 3 are Kiwi Grapefruit, Lavender and Herbal Mint.

Can I order private label products?

Yes, contact us for minimum quantity amounts

FEATURES

- No harsh chemicals, leaves a pleasant citrus fragrance.
- Quickly wipes away heavy dirt to restore a brilliant shine.
- Leaves behind a protective coating which shines surfaces and preserves them from water marks and corrosion.

Testimonials

What our clients have to say

Stephanie Hechenberger

Head of Operational Excellence at Opal Aged Care

"In 2018 Opal introduced the InterClean microfiber cleaning system supported by electronic scheduling.

The electronic scheduling system has helped our large organisation better understand cleaning requirements and monitor efficiency trends across the business. This information has enabled us to embed strategies to improve customer satisfaction, resourcing and cleaning outcomes and to ensure cleaning hours schedules support high quality cleaning outcomes.

We are currently working with InterClean to further develop the technology with the aim to further improve our customer experience, efficiency and the correct deployment of resources to meet our customers cleaning needs."

Glenn Kenneday

IBIS Care

Rolling out the iClean system has made my role so much easier managing remote Aged Care sites. It used to be impossible to really know what was happening at each site during the day. Now I can quickly look at my dashboards and tell where there are issues that require my involvement, when an area hasn't been cleaned, adjust my scheduling to account for rooms that need to be cleaned twice and easily handle scheduling changes for public holidays.

I use the audits to ensure that my team know how to use the system and how to clean at my facilities, view their audit results online and can use this to assess who needs additional training and which of my staff are doing a great job.

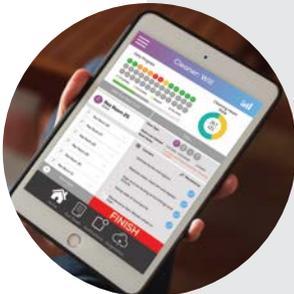

Next Steps

If you want to see how a digital cleaning system can help you manage your cleaning please contact us to arrange for your next step

Do A Site Assessment

The first step if you are serious about improving your cleaning outcomes is to complete an online site assessment. Our cleaning assessors can help you do this.

Start A Trial

By trialling the iClean system on two or three of your sites you will soon discover what is actually happening across your sites and what benefits you are likely to achieve.

See The Benefits Yourself

Discover which areas of your site need extra attention, find out where your key areas of Continuous Improvement are and start reaping the benefits of a transparent cleaning management program.

Start Your Journey of Continuous Improvement

Roll out the iClean Hospitality Suite across your sites and start on your journey of continuous improvement.
