

Antibacterial fruit and vegetable wash system

Complete produce wash system designed to protect patrons and staff

The Suma Eden Antibacterial Fruit and Vegetable Wash System will:

- Reduce microbial levels on treated food stuffs
- Enhance food safety at your facility
- Reduce levels of soil and other contaminants
- While being safe and accurate

Complete system approach

Suma Eden Antibacterial Fruit and Vegetable Wash System is designed to reflect industry's concern regarding foodborne illness and the threats posed to your customers from bacterial cross-contamination.

The system is comprised of:

- Suma Eden D4.5 an antibacterial shelf stable product which contains innovative chemistry in a light weight, 1.5L tamper-proof pack
- Compact and precision engineered Eden dispenser for accurate and safe operation

Safe rinse – free sanitising

Suma Eden D4.5 is formulated with ingredients that can be used for washing of fruit and vegetables without the need to rinse, saving valuable time. Ingredients are listed in the Food Standard Code (FSANZ) as generally permitted processing aids for fruit and vegetables.

Closed, safe and compact

Tamper-proof, lock on and self sealing cap design found on the ergonomically friendly 1.5L bottle protects your staff from contact with concentrated product.

Optimised chemical use

Unlike chlorinated liquid products that degrade over a relatively short period of time making accurate dosing difficult, Suma Eden D4.5 contains a stable blend of lactic and phosphoric acid enabling accurate dosing time after time.

Flexible delivery when and where it is needed to remove unwanted contaminants from your produce as Suma Eden can be used with both rinse and soak methods.

Effective

No other fruit and vegetable wash system delivers antibacterial effectiveness, accurate dosing and operator convenience and safety like Suma Eden.

Concentrated for economical use
– cost and high solution yield.
