

Gas 24" Burnisher

POLIVAC
INTELLIGENT CLEANING TECHNOLOGIES

When you want 2,700 square metres per hour straightline burnishing, you can rely on the legendary long life and reliability of the Polivac Gas 24" Burnisher.

BEST FOR:

- Airports
- Shopping centres
- Supermarkets
- Offices
- Polished concrete
- Schools

RECOMMENDED SURFACES:

- Vinyl
- Granite
- Marble
- Polished concrete
- Terrazzo
- Most ultrahard floors

1949 - 2020
Intelligent Cleaning
Technologies

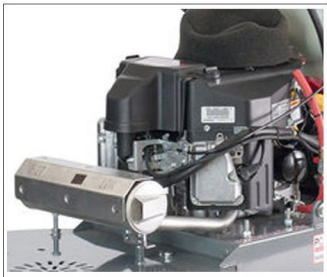

Ultra manoeuvrable and extremely versatile Gas 24" makes straightline maintenance a breeze.

Designed specially for areas where speed is critical, Gas 24"K delivers the high productivity results you need.

Smooth operation makes creating and maintaining that 'wet look' shine easier and faster than you thought is possible.

Power 'Plus' - 2000 RPM

The Gas 24"K is an extremely powerful and high performing machine, equipped with Kawasaki motor: 13kw (18hp).

Closed Loop Engine Emissions Technology

The steady delivery of fuel ensures that CO emissions are minimised and maintained at safe levels which is well below the workplace exposure standard determined by Safe Work Australia of 30 ppm.

Bias Control

This allows the Operator to easily align the machine to prevent any sideways drag, resulting in much smoother, easier operation.

Contour-following system for an even finish

Consistent, maximum floor contact is achieved with the flexible pad holder. The pad constantly follows the contours of the floor surface, ensuring a smooth and dust-free floor every time.

Powder-coated steel base for maximum strength and minimal cleaning

Built to last, Gas 24"K solid construction and highly durable finish ensures long life with maximum presentation.

Single stage active vacuum system / floating skirt

The skirt is positioned within the machine body for greater protection as well as containing the dust so that the active vacuum system leaves the floor dust-free

Push-button, electric start

Easy starting every time with the 12 volt, long life battery.

Ultra-reliable Kawasaki V-twin Power

The 18 horsepower Kawasaki motor ensures consistent power delivery to the pads for even and patch-free finish.

TECHNICAL SPECIFICATIONS

MODEL	GAS 24"K
MOTOR	13 kw (18 hp) Kawasaki V-Twin.
PAD SPEED	2500 rpm
WEIGHT	GAS 24"K 110kg
DRIVE	Belt
VACUUM	Single stage, active centrifugal with metal impeller
BATTERY TYPE	12 volt, 20 amp hour, gel, sealed
GAS BOTTLE	9 kg (Optional extra)
NOISE	89 db
START	Key electric
FINISH	Industrial enamel and powder-coated.
WARRANTY	1 year on motor and parts

This machine operates at a noise level more than 85 d(B)A. Therefore, hearing protection must always be worn when operating this machine.
