SAI GLOBAL

The Gazda 32" (83 cm) is a high speed polisher equipped with twin independent 42.5" pads designed for tough cleaning jobs.

Power Plus - 2500RPM

The Kawasaki 23hp engine and the unique Gazda design combine to give 2500rpm pad speed on the floor. True Ultra high speed performance to give your floor the highest gloss level.

Closed Loop Engine Emission Technology

The steady delivery of fuels ensures that CO are minimized and maintained at safe levels, which is well below the workplace exposure standard determined by Safework Australia of 30ppm.

Dust Control System

The efficiency of the new dust control system combined with the full-surround skirt leaves the floor virtually dust-free, no more do you have to re-sweep the floor, or dust shelves after buffing.

- High Tech Fully Sealed Lead Acid Battery. It's completely maintenance free - no topping up, no corroded terminals, ever. This means at least five years trouble-free battery life, with 1 year manufacturers warranty.

- Easy-to-use gas cylinder clamp makes cylinder changing quick & easy, even if your cylinders aren't the same size.

- Improved Padlok pad retainer for quick, simple pad changing: improves the grip on the pad. No tools needed to change pads.

- Clearly labelled features & controls minimises training of new operators, helps ensure correct maintenance of your valuable investment.

- Easy-to-empty dustbag is twice the size, no troublesome zips or closures to get broken or lost.

- Our fully-floating skirt is made of ultra-tough, hard wearing plastic. The pads are fully enclosed to contain the dust raised when you buff. The high performance vacuum fan blows the dust away into the filter bag.

- Gazda Tough Design. All materials used in making a Gazda are selected to give the longest possible service.

- All components fitted are of the highest quality, and approved by the Australian Gas Association, as required by AS1425.

TECHNICAL SPECIFICATIONS

ENGINE: 23hp Kawasaki Engine

DRIVE PAD SPEED: 2500 RPM

PAD SIZE: Twin independent 42.5 cm pads

WEIGHT: 200 kg

BATTERY: 12volt, 20amp hours

BEST FOR:

- Airports
- Basketball courts
- Shopping centres
- Sports centres
- Supermarkets
- General large area burnishing

RECOMMENDED SURFACES:

- Vinyl
- Granite
- Marble
- Polished Concrete
- Terrazzo
- Most ultrahard floors
